

Fuel Surcharge Policy

Effective 3/15/2022

Due to the increase in fuel prices that has taken place in recent months, our fuel surcharge policy will now go into effect when the east coast on-highway diesel average reaches \$4.00 per gallon. The fuel surcharge will be based on the weekly DOE survey price for the New England Region.

The website is updated weekly every Monday.

There will be a 1% increase on the total invoiced amount, every additional \$0.10 increase in added to the east coast average will result in an increase. Please note that if the average goes below \$4.00 per gallon the fuel surcharge will be eliminated.

The table below shows the surcharge amount based on the fuel prices.
